Colours and numbers

Nombre: _____ Fecha: _____

Qué vas a aprender

- Name ten colours in English
- Ask and answer What colour is it?
- Count from one to ten
- Ask and answer How many?
- Say my favourite colour

Para pensar

Look at the sky. What colour is it? Can you say it in English?

Explicación

1. Red, blue and yellow

Let's learn three colours: red, blue and yellow.

A tomato is **red**. The sea is **blue**. A banana is **yellow**.

Point to something red in your classroom. Now point to something blue!

2. Green, orange and pink

Now three more colours: green, orange and pink.

The grass is **green**. An orange is **orange**. A pig is **pink**.

Orange is a fruit and a colour. Nice!

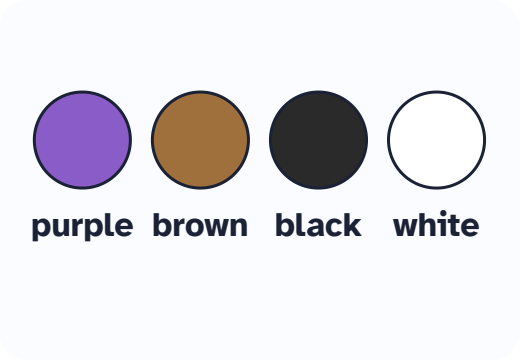

3. Purple, brown, black and white

More colours: purple, brown, black and white.

Grapes can be **purple**. Chocolate is **brown**.

The night is **black**. Snow is **white**. Now you know ten colours!

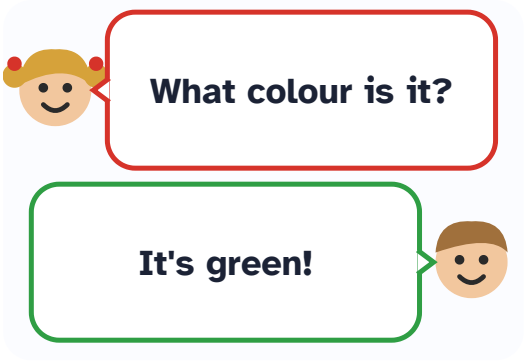

4. What colour is it?

To ask about colours, we say: What colour is it?

We answer: **It's red.** or **It's green.**

Play with a friend. Point to a pencil and ask. Your friend answers!

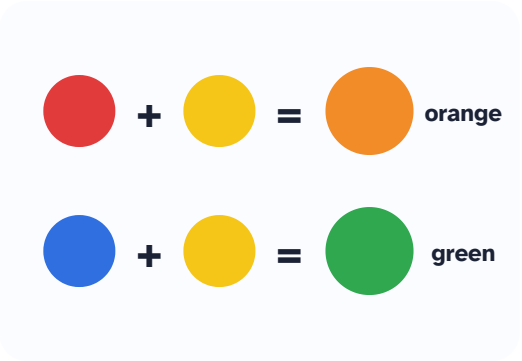

5. Mixing colours

Colours can mix. It's like magic!

Red and **yellow** make **orange**. **Blue** and **yellow** make **green**.

Red and **blue** make **purple**. Try it with paint!

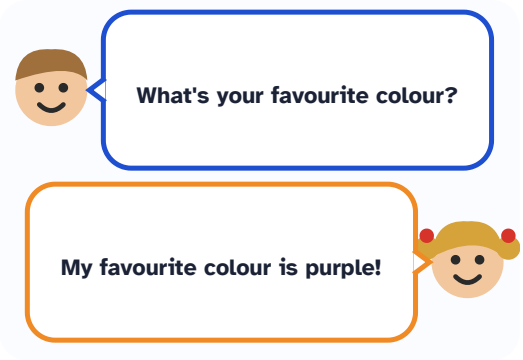

6. My favourite colour

We all have a favourite colour.

Ask: **What's your favourite colour?**

Answer: **My favourite colour is purple.** What's your favourite colour?

7. Numbers one to five

Let's count: one, two, three, four, five.

Show your fingers. One hand has **five** fingers.

Say the numbers out loud. Clap your hands for each number: one (clap), two (clap)...

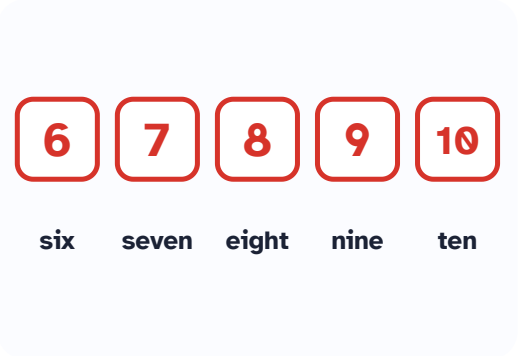

8. Numbers six to ten

Let's count more: six, seven, eight, nine, ten.

Two hands have **ten** fingers.

Count from one to ten. Then count back from ten to one, like a rocket: ten, nine, eight... zero! Blast off!

9. How many?

To ask about numbers, we say: How many?

How many apples? Count them: one, two, three. **Three apples!**

With more than one, we add an **s**: one apple, two apple**s**.

How many apples?

Three apples!

10. Colours and numbers together

We can use numbers and colours together.

Two red balloons. Four yellow stars. One green frog.

The number goes first. Then the colour. Then the thing. Easy!

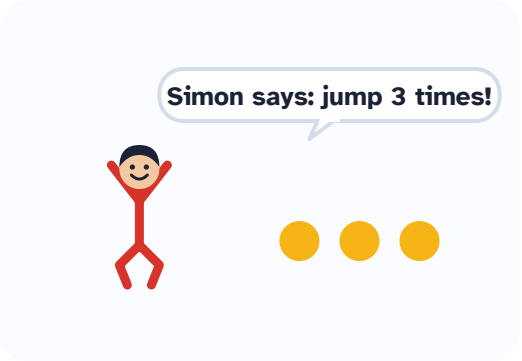

two red balloons four yellow stars

11. Game: colour and count

Play Simon says with colours and numbers!

«Simon says: touch something blue!» «Simon says: jump three times!»

Listen carefully. If the teacher does not say «Simon says», don't move!

12. Review: I know colours and numbers

Now you know ten colours: red, blue, yellow, green, orange, pink, purple, brown, black and white.

You can count from one to ten.

You can ask **What colour is it?** and **How many?** Great job!

Ten colours, ten numbers

red blue yellow green orange pink purple brown black white

1 2 3 4 5 6 7 8 9 10

one two three four five six seven eight nine ten

Ejercicios

1. **Point to something red.**

2. **Say three colours in English.**

3. **Count from one to five.**

4. **What colour is the grass?**

5. **Colour a sun yellow.**

6. **Show me six fingers.**

7. **What number comes after two?**

8. **Match: rojo – red, azul – blue.**

9. **Count from one to ten.**

10. **What colour is snow?**

11. **How many legs has a dog?**

12. **Complete: Red and yellow make ____.**

13. **Answer: What's your favourite colour?**

14. **Draw two blue fish.**

15. **Write the number: seven.**

16. **Write the word: 9.**

17. **Count back from ten to one.**
